Case – 3

Shrimati Pophali , wife of Advocate Pophali, residing near the palace of Raja Laxman Rao Bhonsle , Nagpur. This lady suffered from malaria during her pregnancy. She was treated by quinine which caused abortion. After abortion she suffered from indifferent health and was treated allopathically. She recovered health to some extent apparently ; became pregnant again and got malaria again during that pregnancy. She was again treated with quinine, and again aborted .After that her health was very much deranged and she came to me for treatment. I undertook the treatment on condition that if she got malaria she should be kept under.

My treatment . Her husband agreed. Under my treatment she gradually improved and became pregnant again. When the pregnancy was far advanced she got malaria a third time. It was my turn now to show my skill and the beneficial effects of homeopathic medicines. She suffered from remittent malaria for 16 days and was administered Nat. mur . of high potency. This time there was no abortion and the lady gave birth to a very healthy ohild and she herself continued very healthy after delivery.

Conclusion

This case well illustrates the bad effects of quinine on pregnant women and the helplessness of the allopaths in treatment of malaria in pregnant women . Homeopathic medicinces administered to pregnant women cause no harm and cure the diseases even in those conditions.
